Takashimaya Department Store
12/2017 – 02/2018

SKILLS

C# · Web Development · Teamwork · Python · Javascript · Bootstrap · HTML 5 · CSS3 · Customer Service · Time Management · Collaboration

PERSONAL AND SCHOOL PROJECTS

Object Oriented Programming with Python
(10/2018 – 03/2019)
- The project is about creating a transport website which helps users to be able to view the arrival of buses and trains. They are also able to track the amount of money they spent on transport. They are also able to plan travelling route

E-Business Project with C# & ASP.NET
(04/2019 – 08/2019)
- For this project my team decided to create a eCommerce 24 hour laundry business. The business assigns delivery and pickup drivers to user house to pick up the dirty laundry and deliver back clean laundry.

Enterprise Application Development with C# & ASP.NET
(10/2019 – 03/2020)
- This Project is about a B2B website. My team's idea was a computer repair shop which provides fast and cheap repairs to customers. We also provides consultation services for Customers.
